Diagnostic setting

Save | Discard | Delete | Feedback

A diagnostic setting specifies a list of categories of platform logs and/or metrics that you want to collect from a resource, and one or more destinations that you would stream them to. Normal usage charges for the destination will occur. Learn more about the different log categories and contents of those logs

A more flexible, faster, and robust way to collect metrics is in preview! Click here to configure platform metrics collection from microsoft.storage/storageaccounts/blobservices to storage account, event hubs, and Log Analytics workspace. Learn more.

Diagnostic setting name: storage-to-log-analytics

Logs

Category groups

- [ ] audit
- [ ] allLogs

Categories

- [x] Storage Read
- [x] Storage Write
- [x] Storage Delete

Destination details

- [x] Send to Log Analytics workspace

Subscription: Azure for Students

Log Analytics workspace: aquafresh-logs-workspace (centralindia)

- [ ] Archive to a storage account
